HUET BROTHERS

PERSONAL NOTE

02

STILL IN PURSUIT OF THE ORIGINAL SPIRIT

In January 2012 we showed you drawings of the HB Coupé series. Due to the overwhelming response we have continued to design and adjust to make it a feasible project. We have made some big changes. We down sized the engine from 6 to 4 cylinders. We managed to reduce the weight by 200 kilo's. The result is a light weight car with the same performance but using less fuel. It is serviceable in any garage. It has modern day comforts and safety features. It can be used as a daily driver, but awards the more sportive driver. We believe it is the way to go. There will be a limited production run of 40 cars in total in 2014. Reserving a production slot is based on first come first serve. Details are further down in this document.

HB COUPÉ MODELS;

HB Coupé Classic
Full Carbon Monocoque structure weighing only 800 KG with modern safety features and comforts. 17 inch light alloys.

HB Coupé Road Racer
Full Carbon Monocoque structure weighing only 800 KG with modern safety features and comforts. 19 inch light alloys.

Height: 1180 mm
Width: 1830 mm (including mirrors - road racer)
1760 mm (without mirrors)
Wheelbase: 2472 mm
Weight: 800kg

CARBON FIBRE MONOCOQUE

Our Monocoque structure is best explained by this simple image. It consists of 3 parts - the chassis plate, the inner shell and the body shell. It is quite something special. It has impact zones in front and back and reinforced side impact structures. It is very strong and very light. The complete monocoque weighs less then 100 kilo's.

Contrary to general belief carbon fibre can be fixed in case of small mishaps. It is extremely durable and the material properties are excellent for car construction. We use vacuum injection for our 29 moulds. It is completely handcrafted in house.

RESERVATION PROCESS

02

STILL IN PURSUIT OF THE ORIGINAL SPIRIT

First come first serve. Reservations are split into 5 sections. Reservation form, payment 1, payment 2, test drive and final payment 3. The reservation form reserves a production slot for a HB Coupé for 30 days. To secure a *reserved production slot* you need to pay the reservation fee of € 10000,-- which will be held by Huet Brothers on a separate savings account. This is a refundable deposit in case you need to exit. Another down payment of €30000,-- will be asked when the production starts and includes a purchase agreement stating the exact options for the HB Coupé. After test driving and final approval the final payment is upon delivery.

- **Reservation form** = reserves a production slot.
- **Payment 1** = €10k to savings account Huet Brothers = secures production slot. Refundable.
- **Payment 2** = €30k down payment = production start + purchase agreement.
- **Test drive and final approvement**
- **Payment 3** = Remainder in Euro's including taxes and applicable options upon delivery.

PHOTOBOOK

All reservations get an extremely cool 36 page photo album that will help them to decide on their options and the personalization of their HB Coupé. It has unseen images that will blow your mind. For those enthusiasts who can't afford the HB Coupé but do want the photo album we offer it for sale at cost price on www.huetbrothers.com.
