

CREATE YOUR OWN SPARK

IN 6 SIMPLE STEPS

SELECT THE NUMBER OF PASSENGERS

Sea-Doo Spark 2up
(Capacity: 2 persons / 160 kg [350 lb.])

Sea-Doo Spark 3up
(Capacity: 3 persons / 205 kg [450 lb.];
an ideal capacity for 2 adults and 1 child)

ADD THE ONLY ON-WATER BRAKE

With our exclusive Intelligent Brake and Reverse (iBR™) system you can stop up to 30 m (100 ft.) sooner⁶ than other watercraft. Plus, get added manoeuvrability and simple docking.

PICK YOUR COLOUR

Choose from Vanilla, Orange Crush, Bubble Gum, Pineapple or Licorice colourations and personalize your Sea-Doo Spark to match your taste.

PICK YOUR ENGINE

Rotax 900 ACE³ – This is the most fuel-efficient engine on the market. It allows the Sea-Doo Spark to reach a top speed of 64.4 km/h (40 mph)⁴ and uses just 7.3L (1.94 US gal.)⁵ of fuel per hour.

Rotax 900 HO ACE – A more powerful engine with better acceleration. It can reach close to 80.5 km/h (50 mph)⁴, yet still only uses up to 9L (2.4 US gal.)⁵ of fuel per hour.

ADD THE CONVENIENCE PACKAGE

It's a package that adds great value with two of our most popular optional features. Get the Front Storage Bin Kit and bring along your personal belongings. And make reboarding easier with the Sea-Doo Step.

PERSONALIZE IT

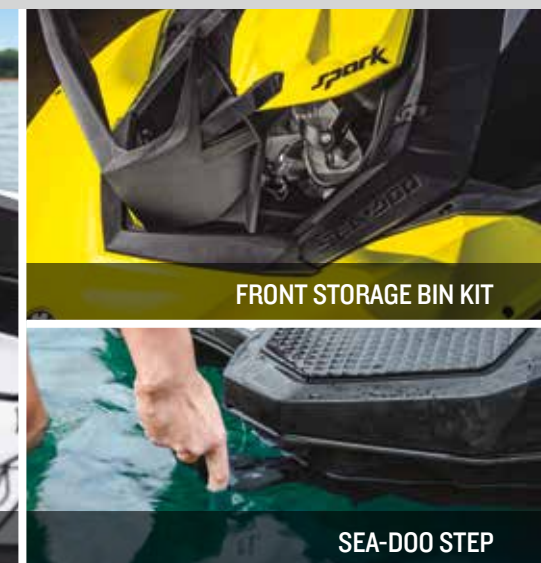

Select fully integrated accessories and one of our 20 Attitude Graphic Kits that will make your Sea-Doo Spark unique to you. It's a unique customization nobody else offers.

FEATURES

Exoskel	Is a minimalist architecture that keeps only the essential structural parts in the front section. It reduces the weight while creating a strong, modern and cutting-edge design that defines the unique and playful nature of the Sea-Doo Spark.
Polytec.....	Is a recyclable, low density and high-impact composite material that includes polypropylene and long glass fiber reinforcements. It was designed for hull and deck applications to maintain the structural integrity of the watercraft under stress while providing light yet durable parts to support the construction of the product.
iTC™..... (Intelligent Throttle Control)	Fly-by-wire system that works electronically (no cables) to transfer the input from the throttle lever to the engine. It's a more responsive and precise throttle control that generates better engine calibration and fuel consumption. It also allows for different riding modes like the sport mode that's available with the Rotax 900 HO ACE engine and it's activated by pressing the button under the cluster for 3 seconds.
D-Sea-Bel™ system.....	Combines a series of resonators and vibration-absorbing components to make Sea-Doo watercraft some of the quietest on the water.
Closed-Loop Cooling System.....	Uses coolant to keep the engine running at the ideal temperature, much like a car's radiator. Also keeps out corrosive salt water and debris.
Handlebar-mounted.....	Engine starts and stops with single, start/stop button
Multifunction Digital..... Information Centre	Reports up to 16 key operating functions including: Sport (HO engine) / Touring mode, Fuel level, Tachometer, Speedometer, Fuel consumption meter, Hour meter.
Off-Throttle Assisted	Provides the operator with additional steering effect in off-throttle situations for greater manoeuvrability.
Stainless steel impeller	Delivers improved acceleration, higher top speed and less cavitation.
Sponsons	
Wetgrip footboard	
Tow hook	
Reboarding handles on rear platform	
Rear grab handle	
Emergency floating lanyard	
Operator's guide, instructional video and booklet	
Single drain plug	
Knee pad	
External exhaust cooling flush attachment (flush fitting)

FACTORY-INSTALLED OPTIONS

Seating Capacity.....	Two options: 2up or 3up (for those looking for more room and watersports capabilities). For 2 or 3 persons, the slim seat allows riders to have more mobility and freedom of movement on the watercraft.
Engine.....	Two options: Rotax 900 ACE (2up only) or Rotax 900 HO ACE. This is a 899cc four-stroke engine, with three cylinders and four valves per cylinder. It allows for the creation of the most compact and lightweight engine on the market. Built with the acclaimed Advanced Combustion Efficiency technology it's also the most fuel-efficient watercraft in the industry ² while still delivering excellent power-to-weight ratio.
iBR (Intelligent Brake & Reverse)... system (opt. with HO engine)	The world's only on-water braking system, iBR lets you stop up to 30 m (100 ft.) sooner than any other watercraft ³ ! All with the squeeze of a lever. And with its electronic reverse, it gives you a level of manoeuvrability that makes docking easier.
Convenience Package.....	It includes the Sea-Doo Step and the Front Storage Bin Kit.
Colours available.	Vanilla, Pineapple, Orange Crush, Licorice and Bubble Gum.

OTHER OPTIONS

Attitude Graphic Kit	20 options with 3 different levels of wrapping enable you to personalize your Sea-Doo Spark even more.
